Paris, February 27, 2018

**Make Our Planet Great Again**

Launch of four new funding programs supervised by Campus France

Over 11,000 students and researchers from all over the world answered the French president's call "Make Our Planet Great Again" launched on June 2 to the international community. 18 senior researchers, winners of the long stay program (3 to 5 years) and postdoctoral students were received on December 11 by President Emmanuel Macron.

In order to answer as broadly as possible to the interest created by this initiative, 4 specific programs labelled "Make Our Planet Great Again" were launched in February 2018 by the Ministry of Europe and Foreign Affairs and the Ministry of Higher Education, Research and Innovation for students and young researchers who want to continue a Master’s course focused on the subject of climate change, study in a doctorate/PhD or postdoctorate, but also work with French researchers in short stays in France. The programs focus on earth system sciences, climate change and sustainability sciences, and energy transition, and are supervised by Campus France:

1. **Co-funding of doctoral contracts**: institutions will receive co-funding totalising 50,000€ to welcome a doctoral student for 3 years. About 20 doctoral students will receive funding for thesis starting in 2018.

2. **Co-funding of postdoctoral contracts**: host institutions will receive co-funding totalising 25,000€ for one year or 50,000€ for two years to recruit a postdoctoral student. About 20 postdoctoral students will benefit from funding for stays starting in 2018.

3. **Research short stay**: mobility funding from 14 days to 5 months for foreign doctoral students or researchers in a stay in a French lab. About 40 mobility programs will be financed for stays organised in 2018 only.

4. **Excellence scholarships totalising 1,060€/month** for students who want to come to France for 2 years in Master's course or one year in Master's 2 course. About 50 scholarships are planned for the academic year 2018.

The call is open and applications may be sent from March 12 to April 6, 2018 (March 30 for doctorate/PhD).
