TABLE OF CONTENTS

This document introduces a non-exhaustive inventory of funding options available for developing France-Japan Science & Technology collaborations. It lists a variety of programmes supporting science and technology-related projects, mobility or study. Certain programmes may have slightly changed, yet this document is regularly updated and uploaded on this page.

STUDY GRANTS

FRENCH GOVERNMENT GRANT

The French government grants’ programme aims to fund Japanese students in scientific fields to complete either a part of their studies in France or a research internship in a French research institution. The language of application can be French or English. The allowances and benefits vary according to the students’ level of study.

- **For Bachelor’s (French-Japanese double degree only)/Master’s (all) students:**
  - Scholarships: from 1 up to 10 months from September 1st

- **For PhD students:**
  - Single fellowships: one stay from 3 to 18 months
  - Alternating fellowships: one 1-6 month stay per year, up to 3 years (recommended for collaborative co-mentored theses)

FRENCH GOVERNMENT EIFFEL SCHOLARSHIPS

The Eiffel Excellence Scholarship Programme was established by the French Ministry of Europe and Foreign Affairs to enable French higher education establishments to enroll foreign students in their master’s and PhD courses. Students have to choose a French institution according to their project of study, and then the French institution can apply with the students to the Eiffel scholarships.

More information

EUROPEAN UNION - MARIE SKŁODOWSKA-CURIE ACTIONS

The Marie Skłodowska-Curie actions (MSCA) provide grants for all stages of researchers' careers - be they doctoral candidates or highly experienced researchers - and encourage transnational, intersectoral and interdisciplinary mobility. The MSCA enable research-focused organisations
(universities, research centres, and companies) to host talented foreign researchers and to create strategic partnerships with leading institutions worldwide.

More information

**N+I NETWORK - FIER DOC PROGRAMME**

The FIER-DOC (French Innovative Experience in Research) programme is dedicated to candidates who are completing a Master (or who have already got one) and who want to acquire knowledge and experience in the management of "research projects" and eventually to pursue on a doctoral thesis. It aims to acquire the necessary skills to manage research projects (patents, intellectual property, ethics, contract drafting, project management, communication, etc.) useful to any future manager of applied research programmes and to participate in a genuine research experience in France.

More information

**ACADEMIC-INDUSTRIAL GRANTS**

**ANRT - CIFRE GRANTS FOR PHD STUDENTS**

CIFRE stands for Industrial Agreement of Training through research. It is open to master degree graduated students who wish to become full-time PhD students. The PhD students should be enrolled in a doctoral course in a French laboratory and hired by a French company. With the CIFRE grant, the student will be able to fully work on his research project by dividing his time in the company and the academic laboratory. The grant programme CIFRE contributes to the funding of PhD students in enterprises up to 14 000€/year for 3 years. The company can also benefit from the “Credit impôt-recherche”. All nationalities are eligible.

More information

**RESEARCH FELLOWSHIPS**

**EUROPEAN UNION - VULCANUS IN EUROPE PROGRAMME**

The programme consists of industrial placements for Japanese students within the European Union. It starts in April and ends in March of the following year in order to accommodate the academic year in Japan. The students follow:

- a seminar in Brussels on European culture, industry and the EU,
- a four-month intensive language course (of the country she/he will choose),
- and an eight-month traineeship in a European company.

More information
CANON FOUNDATION RESEARCH FELLOWSHIPS

Annually, the Canon Foundation in Europe grants up to 15 Fellowships to highly qualified European and Japanese researchers. European fellows are expected to pursue a period of research in Japan whereas Japanese fellows are expected to run their research in Europe. Canon Foundation Fellowships works for a minimum period of three months up to one year.

SUMMER PROGRAMMES

EPF - ESTP SUMMER PROGRAMME

EPF-ESTP Summer Programme on Smart Cities & Engineering for Sustainable Architecture offers an in-depth study on topics such as engineering for eco-cities and smart cities, environmental issues, city planning and architecture for the future. Mainly designed for Undergraduate and Master’s students with a major in Engineering, Architecture, Urban planning/design, Sociology or Computer Sciences.

More information
This programme is open to French master’s and PhD students. It offers a grant to become a “research-students” (auditeur libre) or a “regular student” in a Japanese university. Master’s students’ mobility will last 2 years while PhD students’ mobility will last 3 years. The monthly grant is about 144,000 yen for master’s students and about 145,000 yen for PhD students.

The MEXT also coordinates priority international programmes for PhD & master’s students, on identified topics in several Japanese universities.

The Marie Skłodowska-Curie actions (MSCA) provide grants for all stages of researchers’ careers - be they doctoral candidates or highly experienced researchers - and encourage transnational, inter-sectoral and interdisciplinary mobility. The MSCA enable research-focused organisations (universities, research centres, and companies) to host talented foreign researchers and to create strategic partnerships with leading institutions worldwide.

SCHOLARSHIPS GRANTED BY LOCAL COMMUNITIES AND INTERNATIONAL ASSOCIATIONS

More than 30 cities or prefectures or private foundations offer one-year scholarships for international foreign students and PhD students.
**RESEARCH FELLOWSHIPS**

**JSPS PRE-POSTDOCTORAL FELLOWSHIP PROGRAMME FOR FOREIGN RESEARCHERS**

- **HUMANITIES**
- **SOCIAL SCIENCES**
- **NATURAL SCIENCES**

**Standard programme:** This programme funds 12 to 24 months stays in Japan for young postdoctoral researchers (up to 6 years after the thesis completion).

**Short-term programme:** This programme funds 1 to 12 months stays in Japan for pre and post-doctoral researchers from the Europe Union countries, the US and Canada.

*Applications from researchers employed in a French institution must be submitted to the CNRS and the JSPS.*

**EUROPEAN UNION - VULCANUS IN JAPAN PROGRAMME**

- **ENGINEERING SCIENCES**
- **APPLIED SCIENCES**

The programme consists of industrial placements for EU / COSME* students in Japan. It starts in September and ends in August of the following year in order to accommodate the academic year in EU Member States. The students follow:

- a one-week seminar on Japan,
- a four-month intensive Japanese language course,
- and an eight-month traineeship in a Japanese company.

**CANON FOUNDATION RESEARCH FELLOWSHIPS**

- **ALL FIELDS OF SCIENCE**

Annually, the Canon Foundation in Europe grants up to 15 Fellowships to highly qualified European and Japanese researchers. European Fellows are expected to pursue a period of research in Japan whereas Japanese Fellows are expected to do their research in Europe. Canon Foundation Fellowships are for a minimum period of three months up to maximum of one year.

More information

**HOSEI INTERNATIONAL FUND FELLOWSHIP PROGRAMME**

- **HUMANITIES**
- **SOCIAL SCIENCES**
- **NATURAL SCIENCES**
- **ENGINEERING SCIENCES**

Invitations are extended to young scholars from abroad who are, at the least, enrolled in a doctoral degree programme in order to apply to the Hosei International Fund Fellowship Programme to carry out non-degree research programmes at Hosei University under the direction of, and/or, in cooperation with Hosei faculty and researchers.

More information
“ASSOCIATION OF FRENCH-SPEAKING FORMER JSPS FELLOWS” - TAKENOKO GRANTS

The “Association of French-speaking former JSPS fellows” supports the mobility of French students from Bachelor (3rd year) to Master (1st or 2nd year) who wish to complete their training by integrating a laboratory or a research team in Japan. The support is of 800€.

More information

RIKEN INTERNATIONAL PROGRAMME ASSOCIATE

International programme Associate is a non-Japanese doctoral candidate attending a Japanese or overseas graduate school participating in RIKEN’s joint graduate school programme. IPAs conduct research at RIKEN under the supervision of RIKEN scientists as part of work toward obtaining a PhD. RIKEN’s joint graduate school programme is based on agreements with a number of Japanese and overseas universities and aims to identify and foster talented young scientists capable of contributing to the advancement of science for the global community. French partner universities are: Université de Caen Basse Normandie ; Université Claude Bernard Lyon 1 (UCBL) ; Université de Strasbourg ; Université Paris-Sud.

More information

SUMMER PROGRAMMES

CNRS - JSPS SUMMER PROGRAMME

This programme offers to master’s, PhD students and postdocs from France to pursue research under the guidance of host researchers at a Japanese university or a research institute over a period of two months during the summer (June – August).

More information

RIKEN CENTER FOR BRAIN SCIENCE SUMMER PROGRAMME

The Summer Programme is designed to encourage and further the education of young neuroscientists and emerging researchers as they enter the international neuroscience community. Applicants may choose either a two-month laboratory internship (Plan A) within a RIKEN CBS laboratory, or an intensive 5-day lecture course (Plan B) featuring a distinguished international faculty. Those participating in the internship may also enroll in the lecture course.

More information
ELYT SCHOOL

ENERGY, ENVIRONMENT, SAFETY AND ENGINEERING

Created to promote exchanges between student-engineers and students in French and Japanese masters, ELyT School Summer School is organized each year alternately between Lyon and Sendai, and relies on strong links woven between the CNRS, the University of Lyon and Tohoku University in Japan.

More information

NETWORKS

N+I NETWORK

ENGINEERING SCIENCES

This network gathers several French Engineering schools and allows their French students to look for an engineering curriculum abroad in a partner university. The “n+i” network is an intermediary between the students and the partner universities/companies abroad.

More information
The ANR and JST research agencies signed a new collaboration agreement in scientific research that resulted in the CREST programme. It was concretized in 2018 by the launch of a joint call with two priority areas:

- **computational foundation**: Technology for Computing Revolution for Society 5.0
- **symbiotic interaction**: Creation and development of core technologies interfacing human and information environments

The 2019 joint call was pre-announced in January 2019. More information on ANR website
More information on JST website

This programme aims to reinforce the collaborations between the projects’ teams from INRIA and high level research teams from all around the world. The Japanese teams will receive support from the JSPS. The grant provided to the French team will be about 10,000€/year for 3 years. The Japanese team will receive the same amount from the JSPS.
More information

CNRS launches a call for proposals that aims at enabling independent and talented young scientists to create and lead an original project within a CNRS affiliated laboratory. The CNRS-Momentum funding is allocated for a period of 3 years and has identified 13 different eligible thematic for this call.
More information
CNRS – INSERM ATIP AVENIR

**LIFE & HEALTH SCIENCES**

The CNRS and INSERM jointly coordinate the call ATIP Avenir, open to young researchers from all nationalities, allowing them to conduct a research project in France in the fields of life science and health for 3 years.

HUMAN FRONTIER SCIENCE PROGRAMME

LIFE SCIENCES

This international programme funds research projects and mobility for postdoctoral or experienced researchers in the field of Life Sciences. France and Japan are both members of the HFSP.

More information

MOBILITY PROGRAMMES

FRENCH GOVERNMENT - HUBERT CURIEN PARTNERSHIP (PHC) SAKURA

ALL FIELDS OF SCIENCE

This programme aims to facilitate exchanges between French and Japanese partners working on a joint project. The programme funds 12 projects per year, for duration of 2 years.

The Japanese scientific partner should be under 46 y.o and the overall projects should involve active young researchers at a PhD or post-doc level.

The annual call for projects covers all fields of research, including humanities and social sciences (contemporary subject being encouraged). Please note that the French team and the Japanese team have to submit the same project to their own national institution: Campus France or the JSPS, to be eligible.

More information for French teams

RESEARCH FELLOWSHIPS

JSPS INVITATION FELLOWSHIPS FOR RESEARCH IN JAPAN

HUMANITIES | SOCIAL SCIENCES | NATURAL SCIENCES

This programme allows researchers employed in Japanese universities/research institutions to invite overseas researchers (who have a position equivalent to university professor, associate professor or assistant professor; or researchers who have completed their thesis more than 6 years ago) to carry out our research through long-term visits or to engage discussions, opinion exchanges, lectures or other activities through short-term visits.

Long term stays: 2 to 10 months.
Short-term: 14 to 60 days.

More information

JSPS INVITATION FELLOWSHIPS FOR RESEARCH IN JAPAN (DISTINGUISHED RESEARCHERS)

HUMANITIES | SOCIAL SCIENCES | NATURAL SCIENCES

This programme aims to invite overseas researchers with distinguished records of research achievements (Nobel laureates or equivalent) to Japan from 7 to 30 days for purpose corresponding to those records.

EM EASED PROGRAMME - EURO-ASIAN SUSTAINABLE ENERGY DEVELOPMENT

ENGINEERING | MATHEMATICS & COMPUTER SCIENCE | NATURAL SCIENCES | ARCHITECTURE

EM-EASED programme is mainly dedicated to research exchanges and is intended to establish a mobility scheme for about 72 individuals including doctorates (58%), post-doctorates (17%) and staff (25%). The programme is strongly focused on, but not restricted to, energy related projects. This research programme includes Engineering and Technology, as well as Mathematics and Computer Science, Natural Sciences or Architecture fields.
It involves 6 European partners, including Ecole Centrale Paris in France, 5 Japanese partners and 3 Korean partners. It aims at strengthening the collaborations between the involved research teams and between administrative staffs too, so as to share about good practice, pedagogic activities, knowledge and academic acknowledgement.
