**The Vatel Spirit:
Values for life.**

◆ MAIN PROGRAMMES OF STUDY

Our teaching concept has its roots in realities of the profession

Training operational managers and senior executives in the international hospitality industry, who are able to work in a competitive and cosmopolitan environment is of course based on business studies: marketing, human resources, administration and finance.

But that's not all!

At Vatel we believe that a complete education requires a reality check on the professional field. This teaching principle is one of the reasons why a Vatel degree is so highly valued on the job market.

For our students, this means that they experience:

> Hands-on training in the application infrastructures, fully integrated into the Vatel schools. These application hotels or restaurants, catering to real customers, are concrete and operational training venues.

> First managerial experience as senior students manage the junior ones.

> Classes taught mostly by Professionals recognized in their field.

> Progressive building of a career path for each student.

◆ STRENGTHS

- Balance of theoretical courses and professional application.
- A REAL FOUR-STAR HOTEL FOR HANDS-ON TRAINING From the 1st Semester
- a PAID internship each year.
